SEAG Statement of Outcomes 2025-26: Guidance for Parents

Your child's Statement of Outcomes contains four different types of information:

1) Details about your child
2) Your child's Standardised Age Scores, Cohort Percentile and Band in the SEAG Entrance Assessment
3) Your child's additional (Raw Score) Outcomes in the SEAG Entrance Assessment
4) Additional general information

1) Details about your child

This identifies your child by their Pupil Number (UPN), Name, Date of Birth and the Assessment Centre

2) Your child's Standardised Age Scores, Cohort Percentile and Band in the SEAG Entrance Assessment

[If your child only sat one of the two Papers, he/she will have estimated outcomes and the letter "e" appears after each of the outcomes in this section]

A **Standardised Age Score (SAS)** takes account of a pupil's age when he/she took the assessment, the number of correct answers and the degree of difficulty of the Assessment. In the SEAG Assessment the language Section (English / Irish) is standardised to give an English / Irish SAS, the Maths Section is standardised to give a Maths SAS and then those two numbers are added together to give a TSAS (Total Standardised Age Score).

The average (mean) SAS for English / Irish and Maths are both 100. The highest possible is 141 and the lowest is 69. The average (mean) TSAS is 200. The highest possible is 282 and the lowest is 138.

Cohort Percentile shows how well someone has achieved in the Assessment compared to others. Cohort percentiles go from 100 (highest) to 1 (lowest). Someone with a cohort percentile of 90 is in the top 10%; someone with a cohort percentile of 60 is in the top 40%. Cohort percentiles which are less than 20 appear on the Statement of Outcomes as <20.

Bands go from Band 1 to Band 6 and are worked out using the Cohort Percentiles. The top two rows of figures in the Table below are the same each year. The final row shows the TSAS needed for each Band this year.

Cohort Percentile	60 or higher	50-59	40-49	30-39	20-29	Less than 20
Band	**1**	**2**	**3**	**4**	**5**	**6**
TSAS	**207+**	**200-206**	**193-199**	**185-192**	**176-184**	**<176**

The lowest TSAS needed for each year may vary slightly from year to year. Last year, for example, 208 was in the 60th percentile and was in Band 1; this year 207 is in the 60th percentile; TSAS 207 or higher is needed for Band 1.

3) Your child's additional (Raw Score) Outcomes in the SEAG Entrance Assessment

The Table in the Statement of Outcomes sets out, for Paper 1 and Paper 2, how many questions a pupil attempted and how many of the answers were correct. In addition, it shows how many of the English / Irish and how many of the Maths questions in each Paper were answered correctly. Finally, the overall raw score totals are given.

4) Additional general information

This section sets out what to do if there are any inaccuracies in your child's name or date of birth on the Statement and also the information you will need to upload if you are making a post-primary transfer application to an academically selective school. It also sets out what to do if your child has estimated outcomes. Finally, there is information for parents who may be considering having their child's Answer Sheets re-marked.

5) What TSAS or Band will a pupil need to gain a Year 8 place in a particular school for September 2026?

- This question is impossible to answer. Schools do not know how many pupils will apply to them in any one year nor do they know, in advance, what SEAG outcomes those pupils will have.
- Historically, some schools have only been able to take pupils with higher SEAG Bands or TSAS and some have been able to take a broader range of Outcomes.
- Overall, there are around 8,500 academically selective places in SEAG schools and around 12,800 pupils sat the SEAG Entrance Assessment.
