Practice Paper 1

English and Mathematics

First Name: _____
Surname: _____
School: _____
Date: _____

Instructions:

- Do not open this paper until you are told to do so.
- Read each question carefully.
- Mark one answer only for each question.
- If you make a mistake, rub it out and mark your new answer clearly.
- You will have 50 minutes to complete this test.

Note: Questions P1–P10 are warm-up practice questions and do not count toward your score.

Do not start your 50-minute timer until Question 1 of the English Main Test.

Practice Questions

Work through P1–P10 to practise filling in your answers. These questions **do not** count towards your score. Read each question carefully before answering.

English Practice (P1–P5)

P1. Each line is divided into four groups (A–D). Find the group with a capitalisation or punctuation mistake and mark its letter on your answer sheet. Mark N if there is no mistake.

P1 We went to _____ london for _____ the weekend _____ last July. _____ N
A B C D

P2. Choose the best word to complete the sentence. Mark its letter.

She danced ____

P2

slow	quiet	gentle	quickly	softer
------	-------	--------	---------	--------

A B C D E
across the stage.

P3. Find the group that contains a spelling mistake. Mark N if there is no mistake.

P3 I beleive _____ that we _____ should try _____ our best. _____ N
A B C D

P4. Read the sentence below. Choose the best word to complete it and mark its letter.

P4 "The story was exciting. The ending, _____, was disappointing." Which word best completes the sentence?

- A therefore
B because
C however
D although
E meanwhile

P5. Write your answer clearly in the box provided.

Copy the sentence below, adding the missing capital letter: "the cat sat on the mat."

P5

Maths Practice (P6–P10)

For P6–P8, choose the correct answer and mark its letter. For P9–P10, write your answer in the box.

What is 4×6 ?

- P6**
- A** 20
 - B** 24
 - C** 28
 - D** 30
 - E** 36

A film starts at 3:45 pm and lasts 90 minutes. At what time does it end?

- P7**
- A** 4:45 pm
 - B** 5:00 pm
 - C** 5:10 pm
 - D** 5:15 pm
 - E** 5:30 pm

Tom has £2.00. He spends 95p. How much does he have left?

- P8**
- A** £1.05
 - B** £1.10
 - C** £1.15
 - D** £1.00
 - E** £0.95

How many days are there in a fortnight?

P9 Answer in days

A rectangle is 9 cm long and has a perimeter of 27 cm. What is its width?

P10 Answer in cm

English – Main Test

In this exercise there are some mistakes with **punctuation** or use of **capital letters** . On each numbered line there is either **one** mistake or **no** mistake. Find the group of words with the mistake in it and **mark its letter on your answer sheet** .

If there is no mistake, mark N.

Punctuation Exercise

1

The head
coach reminded the team

A

that thursdays training session

B

would take place on the

C

new all-weather
pitch behind the school.

D

N

2

The pupils couldnt wait

A

to begin their project

B

about the ancient pyramids

C

of Egypt.

D

N

3

Every summer, the Martins

A

travel to the coast

B

of Cornwall to visit

C

the rockpools and cliffs.

D

N

4

The cycling coach asked,

A

"Havent you practised

B

the uphill section

C

of the course yet?"

D

N

5

The childrens artwork

A

was
displayed along the corridor

B

for parents to admire

C

during the open evening.

D

N

In this exercise you have to choose the **best** word, or group of words, to complete each numbered line so that the passage makes sense and is written in correct English. Choose the best answer and **mark its letter on your answer sheet**.

Grammar Exercise

The council wrote to

6

^A ^B ^C ^D ^E
residents whose houses were affected by the flooding.

The scientist was disappointed to discover that her colleague had

7

^A ^B ^C ^D ^E
the experiment results without her permission.

The coach was proud because the team had

8

^A ^B ^C ^D ^E
every match that season.

By the end of the championship, the young athlete had

9

^A ^B ^C ^D ^E
three personal records.

Neither the captain nor the crew members had

10

^A ^B ^C ^D ^E
such a violent storm in all their years at sea.

In this exercise there are some **spelling** mistakes. On each numbered line there is either **one** mistake or **no** mistake. Find the group of words with the mistake in it and **mark its letter on your answer sheet** . If there is no mistake, mark N.

Read the **whole** passage carefully, then answer the questions that follow.

The Last Lighthouse Keeper

1 For over forty years, Hamish Donal had tended the lighthouse on the rocky promontory of
2 Carraig Point. Every evening, as the sun melted into the horizon like a dropped copper coin,
3 he would climb the spiral staircase and illuminate the great lamp. The beam swept across the
4 dark water, warning ships of the jagged reefs that lurked beneath the surface. Hamish knew
5 every sound the tower made — the groan of its iron door, the whistle of wind through the
6 lantern room's glass panes. When the coastguard service announced that automated
7 systems would replace all remaining lighthouse keepers, Hamish accepted the news with
8 quiet dignity. He did not rage or protest; instead, he spent his final weeks carefully recording
9 the tides, the wildlife, and the curious rock formations he had observed over four decades.
10 On his last evening, he climbed the stairs one final time, watching the lamp blaze to life, and
11 felt proud that his faithful vigil had guided countless sailors safely home.

Please answer these questions. (Look at the passage again if you need to.) You should choose the **best** answer and

What technique is used in the phrase 'the jagged reefs that lurked beneath the surface'?

- 16
- A Simile, comparing the reefs to hidden creatures
 - B Personification, giving the reefs a threatening, creature-like quality
 - C Alliteration, using repeated consonant sounds for effect
 - D Hyperbole, exaggerating the danger of the reefs
 - E Onomatopoeia, using a word that sounds like what it describes

What does the word 'promontory' mean as used in this passage?

- 17
- A A narrow river estuary
 - B A high point of land jutting out into the sea
 - C A shallow harbour sheltered from storms
 - D A rocky underwater reef
 - E A flat coastal plain near the shore

What does the phrase 'the sun melted into the horizon like a dropped copper coin' suggest?

- 18
- A The sun was extremely hot and dangerous to look at
 - B The weather was stormy and the sky was overcast
 - C The sunset was slow, round, and glowing with a warm reddish colour
 - D The horizon was shimmering because of intense heat
 - E The sun disappeared suddenly without any colour in the sky

How does Hamish feel during his final evening at the lighthouse?

- 19
- A Regretful that he had wasted so many years in isolation
 - B Anxious about whether the automated system would work properly
 - C Bitter towards the coastguard service for replacing him
 - D Proud that his long service had helped keep sailors safe
 - E Indifferent, as he had long expected this moment to arrive

What do we learn about Hamish's character from the way he responds to the news about automation?

- 20
- A He was relieved to finally stop working after so many years
 - B He was angry but kept his feelings hidden from the coastguard
 - C He accepted the change calmly and used his remaining time productively
 - D He tried to convince the authorities to change their decision
 - E He felt his work had been pointless and left without completing his duties

How does the author convey the idea that Hamish had deep knowledge of the lighthouse?

21

- A By describing the technical specifications of the automated system
 - B By listing the names of all the ships Hamish had guided to safety
 - C By mentioning that Hamish had worked there for over forty years
 - D By describing how Hamish knew every sound the tower made
 - E By explaining that Hamish had trained other lighthouse keepers
-

What is the main purpose of this passage?

22

- A To explain how automated lighthouse systems work and why they were introduced
 - B To portray the quiet dedication of a lighthouse keeper facing the end of his lifelong role
 - C To warn readers about the dangers of rocky reefs along the coastline
 - D To describe the daily routine of all lighthouse keepers around Britain
 - E To argue that automated systems should not replace human workers
-

For these questions, write your answers neatly in the boxes provided on your answer sheet.

23

Copy a phrase from the passage that shows Hamish recorded detailed observations before leaving.

24

Copy the simile from the passage that describes the sun setting.

25

Find a compound word in the passage that refers to the government service responsible for maritime safety.

26

What part of speech is the word 'jagged' as used in the passage?

27

Find a word in the passage that means 'watchful guard or watch kept over something'.

28

Copy a phrase from the passage that shows Hamish accepted the end of his role calmly and without complaint.

Maths – Main Test

29 A school tuck shop made £847.50 in sales over 5 days. On the first four days the shop made an equal amount each day, and on the fifth day it made £197.50. How much did the shop make each of the first four days?

- A £155.00
- B £162.50
- C £168.75
- D £172.50
- E £180.00

30 A sports hall has 18 rows of seats. Each row holds 46 seats. On Saturday, 312 seats were empty. How many seats were occupied?

- A 504
- B 516
- C 528
- D 536
- E 496

31 A sports centre charges £6.75 per adult and £4.20 per child for a swimming session. One Saturday, 124 adults and 89 children attended. What was the total amount collected?

- A £1,210.80
- B £1,209.60
- C £1,187.40
- D £1,210.60
- E £1,209.80

32 Three friends share a prize of £486 equally, then each spends £37.50 on a meal. How much money does each friend have left?

- A £124.50
- B £126.50
- C £127.50
- D £128.50
- E £130.00

33

A number is put into a function machine. First it is multiplied by 17, then 289 is subtracted. The output is 1,802. What was the input number?

- A 119
- B 121
- C 123
- D 125
- E 127

34

A train travels 216 km on Monday, 347 km on Tuesday, and 189 km on Wednesday. The same total distance must be covered equally across Thursday and Friday. How far does the train travel each day on Thursday and Friday?

- A 356 km
- B 376 km
- C 381 km
- D 372 km
- E 368 km

35

A cinema sells 347 tickets for a weekend film. Each ticket costs £12. What is the total amount of money collected from ticket sales?

- A £4,044
- B £4,104
- C £4,154
- D £4,164
- E £4,204

36

The interior angles of a quadrilateral are in the ratio 2 : 3 : 4 : 6. What is the size of the largest angle?

- A 144°
- B 150°
- C 156°
- D 160°
- E 168°

37

A shape has 6 faces, 12 edges and 8 vertices. All faces are rectangles. What is the name of this 3D shape?

- A Triangular prism
- B Square-based pyramid
- C Cube
- D Cuboid
- E Hexagonal prism

How many edges does a triangular prism have?

- 38
- A 6
 - B 7
 - C 8
 - D 9
 - E 12

A straight line is drawn. One angle formed on one side measures 63° . What is the size of the reflex angle on the other side of this line at the same point?

- 39
- A 117°
 - B 243°
 - C 270°
 - D 277°
 - E 297°

A shape has vertices at coordinates (1, 2), (1, 7), (5, 7), and (5, 2). A second identical rectangle is placed directly to the right of the first, sharing the side from (5, 2) to (5, 7). What is the perimeter of the combined shape?

- 40
- A 26 cm
 - B 28 cm
 - C 30 cm
 - D 32 cm
 - E 36 cm

A cuboid has a length of 9 cm, a width of 6 cm and a height of 4 cm. If the height is increased by 2 cm, by how much does the volume increase?

- 41
- A 54 cm^3
 - B 72 cm^3
 - C 98 cm^3
 - D 108 cm^3
 - E 116 cm^3

A regular hexagon is divided into 6 equilateral triangles. The perimeter of the hexagon is 54 cm. What is the area of one of the equilateral triangles if each has a perpendicular height of 7.8 cm?

- 42
- A 29.25 cm^2
 - B 32.50 cm^2
 - C 35.10 cm^2
 - D 38.45 cm^2
 - E 42.00 cm^2

43

A shopkeeper buys a jacket for £64. He marks it up by 37.5% to set the selling price, then offers a 20% discount in a sale. What is the final sale price?

- A £68.80
- B £70.40
- C £72.00
- D £73.60
- E £76.80

44

Which of the following fractions is equivalent to 0.675?

- A $\frac{13}{20}$
- B $\frac{27}{40}$
- C $\frac{7}{10}$
- D $\frac{17}{25}$
- E $\frac{3}{4}$

45

Which of the following fractions is exactly halfway between $\frac{5}{12}$ and $\frac{3}{4}$?

- A $\frac{7}{16}$
- B $\frac{1}{2}$
- C $\frac{7}{12}$
- D $\frac{13}{24}$
- E $\frac{11}{20}$

46

A tank holds 120 litres when full. It is currently $\frac{5}{8}$ full. After 15 litres are removed, what fraction of the full tank remains?

- A $\frac{7}{16}$
- B $\frac{9}{16}$
- C $\frac{11}{24}$
- D $\frac{1}{2}$
- E $\frac{7}{12}$

47

A school bus leaves the school at 15:40. It takes 35 minutes to reach the first stop and a further 48 minutes to reach the final stop. At what time does the bus reach the final stop?

- A 17:03
- B 16:58
- C 17:43
- D 17:08
- E 17:23

48

A rectangular garden measures 8.5 m by 6.4 m. A gardener wants to put edging around the entire perimeter. Edging is sold in 2.5 m lengths. How many lengths must the gardener buy?

- A 11
- B 12
- C 13
- D 14
- E 10

49

A bar chart shows the number of goals scored by five football teams in a season. Town: 48, City: 55, United: 42, Rangers: 61, Athletic: 54. What is the mean number of goals scored per team?

- A 50
- B 51
- C 52
- D 53
- E 54

50

A bag contains 24 coloured balls. A Venn diagram shows: 7 balls are red only, 5 balls are both red and blue, 9 balls are blue only. How many balls are neither red nor blue?

- A 2
- B 3
- C 4
- D 5
- E 6

51

A train travels at 80 kilometres per hour. It sets off at 10:15 and arrives at its destination at 12:45. How far has the train travelled?

Answer in km

52

At a school sports day, three teams compete. Team A scores 347 points, Team B scores 285 points and Team C scores 419 points. What is the total number of points scored altogether?

53

A school raises money through a sponsored read. Each of the 425 pupils raises an average of £8. How much money is raised altogether?

Answer in £

54

A bakery bakes 24 trays of biscuits each day. Each tray holds 18 biscuits. How many biscuits does the bakery bake altogether in 5 days?

55

A garden centre sells bags of compost. Each bag costs £6.75. A gardener buys 8 bags. How much does he pay in total?

Answer in £

56

A leisure centre swimming pool is 25 metres long. During one morning session, swimmers complete 520 lengths in total. What is the total distance swum?

Answer in m
