

SEAG-style practice tests

the catapult papers

A stylized illustration of a person with dark hair and sunglasses sitting on a grey, Y-shaped structure that resembles a catapult. The person is holding onto two long, thin arms that curve upwards. The structure has a thick, rounded base and two large, circular wheels at the bottom. The entire illustration is rendered in shades of grey and white, with some orange accents on the person's clothing and the catapult's arms.

the main series

Name: _____

Score: _____

Test 5

2026 edition

Notes for parents

The Main Series of The Catapult Papers provides a full set of SEAG-style practice assessments suitable for P7 pupils (or confident pupils at the end of P6). These papers offer a more challenging level of practice than the Warm-Up Series, reflecting the balance and pace of the official assessments more closely. As with all Transfer Test preparation, children will meet a wide range of English and Maths concepts, including some that require recall of earlier learning.

The questions in this series have been written to give children a realistic sense of the difficulty and variety they will encounter in the actual SEAG papers. The progression across the series helps pupils build accuracy, fluency, and familiarity with the demands of the assessment. Many families use these tests after completing the Warm-Up Series, though the order of use is entirely flexible.

The official time limit for the Transfer Test is 60 minutes. However, because this is a practice paper, no time limit is printed. Parents may decide how long to allow for completion, depending on confidence, focus, and stage of preparation.

This test paper may be written on, but answers must be recorded on the separate answer sheet provided. Guidance on how to do this is included at the top of that page. An answers page is also included for marking. Each correct answer is worth one mark, and no question carries more than one mark. Half-marks should not be awarded. In the English section, misspelled answers should only be accepted when spelling is not part of the skill being tested. When spelling accuracy is required (e.g. plurals, verb endings, homophones), an incorrectly spelled answer should not be counted as correct.

Spaces for recording the final score are provided on both the cover page and the answer sheet. Parents may record the result as a percentage or as a score out of 56.

Finally, please remember that these are practice tests. It is normal for children to make mistakes as they adjust to the level of challenge. The purpose of the Main Series is to develop confidence, build stamina, and strengthen the range of skills needed for the SEAG assessment. Consistent practice and calm encouragement are the most effective supports during this stage of preparation.

Permission to use this paper is granted for one child only. No photocopying or sharing of the test is permitted. A separate set of The Catapult Papers is available exclusively for schools.

English

In this exercise there are some mistakes with **punctuation** or use of **capital letters**. On each numbered line there is either **one** mistake or **no** mistake. Find the group of words with the mistake in it and **mark its letter on your answer sheet**. If there is **no** mistake, mark **N**.

Punctuation Exercise

1 'I can't believe it's snowing,' said Ben, 'after such a warm day yesterday'

A B C D

2 Emily's brothers book was eventually found in Mya's sister's schoolbag.

A B C D

3 'Although some say it's Venus, the nearest planet to earth is actually Mercury.'

A B C D

4 Tilting his head to the right, Henry could read the faded, cracked inscription.

A B C D

5 'Is that really music,' asked Uncle Bill. 'It sounds more like someone's in pain!'

A B C D

In this exercise you have to choose the **best** word, or **group of words**, to complete each numbered line so that the sentences make sense and are written in correct English. Choose the best answer and **mark its letter on your answer sheet**.

Grammar Exercise

6 As we walked slowly after past before onto upon the toy store, we
A B C D E
came to Mr Somerville's old repair shop.

7 The syrup-covered pancakes was making makes were causing
A B C
were making caused me drool like a dog at the foot of the dinner table.
D E

8 Gertrude had never in her long, miserable life gave take given give
A B C D
took anything to anyone.
E

9 We call him 'Chatty Charlie' because he is seldom often regularly
A B C
always daily quiet.
D E

10 'Whatever excuse you give me,' Mrs Patterson warned Jordan,
'there'll its it's that'll it'd better be a good one!'
A B C D E

In this exercise there are some **spelling** mistakes. On each numbered line there is either **one** mistake or **no** mistake. Find the group of words with the mistake in it and mark its letter on your answer sheet. If there is no mistake, mark N.

Spelling Exercise

11

They all said that the final episode of the television series was dissapointing.

**12**

'These are difficult times, my friend. Would you be able to help us out?'

**13**

George separated the dogs from each other when they began to groul.

**14**

The most difficult of her daily excercises involved lifting a heavy weight.

**15**

Although it was traditional for people to have an afternoon nap in Spain, it felt

like a foriegn idea to Anna.

Read the whole passage carefully, then answer the questions that follow.

Star Wars: the original trilogy

1. Star Wars is a legendary movie franchise that has captivated audiences for
2. decades. The original trilogy (which is now known as episodes 4 to 6!) consists of
3. 'Star Wars: A New Hope', 'Star Wars: The Empire Strikes Back', and 'Star Wars:
4. Return of the Jedi'. These movies, directed by George Lucas, introduced new
5. technology and groundbreaking special effects, making them an instant classic.

6. A Thrilling Adventure

7. The first movie in the trilogy, 'Star Wars: A New Hope', takes us on a thrilling
8. adventure with Luke Skywalker, a young farmer who dreams of a better life. Along
9. with the help of Han Solo, a rebellious smuggler, and Princess Leia, a fierce leader
10. of the Rebel Alliance, they set out to defeat the evil Empire and crush their
11. planet-destroying weapon, the Death Star. They are also pursued by the Empire's
12. most ruthless enforcer, Darth Vader, who is intent on capturing Luke and
13. overcoming the Rebel Alliance.

14. The Struggle Continues

15. In 'Star Wars: The Empire Strikes Back', the Rebel Alliance is still struggling
16. against the Empire's rule. Luke, now a Jedi-in-training, travels to the remote planet
17. Dagobah to learn from the wise Jedi Master Yoda. Meanwhile, Han and Leia, who
18. have developed feelings for each other, are on the run from Darth Vader and his
19. forces. This movie has a memorable twist in which the villain reveals a shocking
20. truth that changes the entire trilogy.

21. The Epic Conclusion

22. 'Star Wars: Return of the Jedi', the final movie in the trilogy, brings an end to the
23. epic story. The Rebel Alliance launches a daring mission to rescue Han Solo, who
24. is held captive by the vile gangster Jabba the Hutt. Meanwhile, Luke confronts
25. Darth Vader and the Emperor, as the fate of the galaxy hangs in the balance. This
26. movie features an epic finale where the Rebels launch an attack on the Empire's
27. new superweapon, the Death Star II.

28. May the Force be with You

29. The Force is a central concept in the Star Wars universe. It is a mystical energy
30. field that binds the galaxy together and can be channelled by certain individuals
31. known as Force users, such as the Jedi and the Sith. The Force is used to

32. manipulate objects and influence the minds of others, as well as enhance
33. physical abilities such as speed and agility. It is also a source of moral guidance,
34. with the light side representing goodness, compassion, and selflessness, while the
35. dark side represents fear, anger, and aggression. The Force adds an element of
36. spirituality to the story, making it more than just a simple science fiction adventure.
37. 'May the Force be with you' has become a cultural catchphrase, with fans using it
38. as a way to express goodwill and support.

39. **Box Office Records**

40. The original Star Wars trilogy was a huge success at the box office, breaking
41. records and cementing the franchise's place in cinematic history. 'Star Wars: A New
42. Hope' was released in 1977 and went on to earn over \$775 million worldwide,
43. becoming the highest-grossing film of its time. 'Star Wars: The Empire Strikes Back'
44. and 'Star Wars: Return of the Jedi' were also major box office hits, earning \$538
45. million and \$475 million respectively. Combined, the original trilogy earned over
46. \$1.7 billion worldwide, making it one of the most successful movie franchises of all
47. time.

48. **What Happened Next**

49. The success of the original trilogy led to the creation of the prequel and sequel
50. trilogies, as well as spin-off films, television shows, and a vast array of
51. merchandise. Star Wars has become a cultural phenomenon, with fans of all ages
52. and backgrounds drawn to the epic storylines, memorable characters, and
53. groundbreaking special effects. The box office success of the original franchise is a
54. testament to the enduring popularity of Star Wars and its place in popular culture.

Please answer these questions. (Look at the passage again if you need to.)
You should choose the **best** answer and mark its letter on your answer sheet.

16

Look at lines 1 - 13. Which word means 'a series of three connected stories'?

- A franchise
- B trilogy
- C classic
- D adventure
- E enforcer

17

Who was the director of the original Star Wars movies?

- A Luke Skywalker
- B Han Solo
- C Princess Leia
- D George Lucas
- E Darth Vader

18

What is the overall purpose of this passage?

- A to teach us about a significant movie franchise
- B to teach us how much money successful movies can make
- C to teach us how 'The Force' became a religion
- D to teach us that we can overcome evil
- E to teach us about other planets in our galaxy

19

Which of the following descriptions in the passage tells us that one of the characters is a criminal?

- A a young farmer (line 8)
- B a rebellious smuggler (line 9)
- C a fierce leader (lines 9)
- D ruthless enforcer (line 12)
- E the wise Jedi Master (line 17)

20

Which of the following parts of speech is the word 'twist' (line 19)?

- A verb
- B adverb
- C noun
- D adjective
- E preposition

21

Look at lines 28 - 38. What is 'The Force'?

- A a cultural catchphrase for expressing goodwill
- B an energy made entirely of goodness, compassion and selflessness
- C a science fiction adventure
- D an energy made entirely of fear, anger and aggression
- E an energy that, among other things, improves speed and agility

22

Which word in the passage means 'a story that comes BEFORE another story'?

- A franchise (line 1)
- B epic (line 23)
- C spirituality (line 36)
- D prequel (line 49)
- E sequel (line 49)

For these questions you have to **write your answers**, neatly, in the boxes provided on your answer sheet.

- 23** In which year was the first movie from the Star Wars franchise released?
- 24** How much money did 'Star Wars: The Empire Strikes Back' earn at the box office?
- 25** Look at lines 6 - 13. What is the name of the weapon that can destroy planets?
- 26** What is the subheading for the paragraph that tells us a wide range of goods and products were made as a result of the movies' success?
- 27** Look at lines 21 - 27. Which four-word phrase tells us that a positive outcome for the heroes of the story 'is on a knife-edge'?
- 28** Which one part of speech are the following as they appear in the passage?
- groundbreaking** (line 5), **memorable** (line 19), **original** (line 45), **vast** (line 50)

Maths

29

$$b \div 8 = 64$$

What is the value of the letter b in this calculation?

A 8**B 56****C 72****D 482****E 512****30**

The table shows the prize money won by five snooker players during a single season.

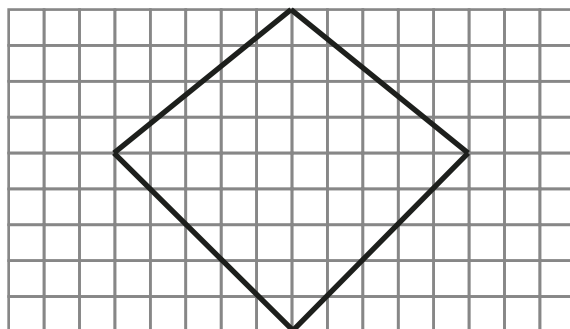

Player	Prize Money
Frank	£2134
James	£1091
Maggie	?
Zoe	£2220
Justin	£1952
Total	£8897

What was the prize money for Maggie?

A £1500**B £1600****C £2500****D £2600****E £7397**

31

A quadrilateral is drawn on a grid.

How many lines of symmetry does the quadrilateral have?

- A 0 lines of symmetry
 - B 1 line of symmetry
 - C 2 lines of symmetry
 - D 3 lines of symmetry
 - E 4 lines of symmetry
-

32

Which of these fractions is equal to $\frac{25}{40}$?

- A $\frac{1}{15}$ B $\frac{3}{5}$ C $\frac{5}{8}$ D $\frac{5}{9}$ E $\frac{15}{30}$
-

33

Which of these combinations of coins makes £10?

- A fourteen 50p coins and ten 20p coins
- B forty 20p coins and ten 10p coins
- C sixteen 50p coins and twenty 10p coins
- D nineteen 50p coins and five 5p coins
- E four 50p coins and thirty 20p coins

34

This table tells us the total number of degrees in four different types of shapes.

As one side is added to each shape, the total number of degrees increases by the same amount.

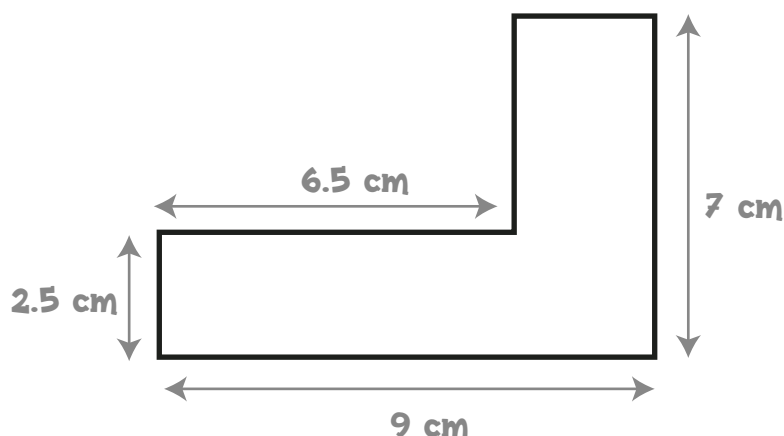

Number of sides	Total number of degrees
3	180
4	360
5	540
6	720

Using this sequence of measurements, what would be the total number of degrees in an octagon?

- A 540° B 720° C 900° D 1080° E 1440°
-

35

Two rectangles are combined to make the following shape.

What is the perimeter of the shape?

- A 25 cm B 29.5 cm C 30.5 cm D 31.5 cm E 32 cm

36

Three teams take part in a weekly table quiz. The table shows each team's scores for the first four weeks of the quiz.

Each quiz is divided into three sections: General Knowledge, Music & Film, and Sport. The teams will then have three scores to add together. The team with the most points will win the quiz that week.

	General Knowledge			Music & Film			Sport		
	Smart Alecs	Know-it-Alls	The Top Table	Smart Alecs	Know-it-Alls	The Top Table	Smart Alecs	Know-it-Alls	The Top Table
Week 1	8	6	5	7	8	9	4	7	6
Week 2	7	7	8	6	5	6	3	7	8
Week 3	6	7	7	7	9	8	5	6	5
Week 4	8	5	4	6	4	7	6	8	8

What was The Top Table's final score on Week 1?

- A 19 points
- B 5 points
- C 24 points
- D 20 points
- E 60 points

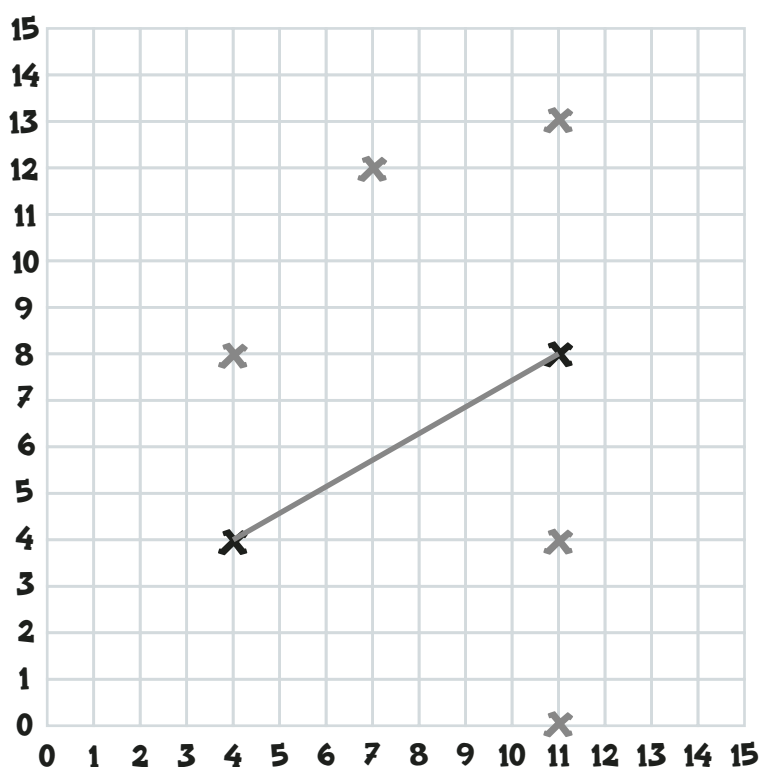

37

Which decimal is equal to 3%?

- A 0.03
- B 0.003
- C 0.3
- D 0.33
- E 3.0

38

The points (4,4) and (11,8) are connected on a grid.

A third point must be chosen to complete the three corners of a scalene triangle.

Which of the five new points marked on the grid would NOT be the third point of a scalene triangle?

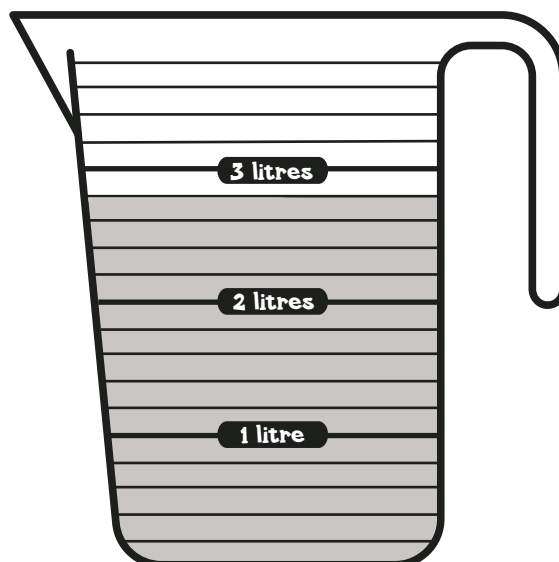

- A (4,8) B (11,13) C (7,12) D (11,0) E (11,4)
-

39

How many prime numbers are greater than 10 but less than 20?

- A 0 prime numbers
B 1 prime number
C 2 prime numbers
D 3 prime numbers
E 4 prime numbers

40

How many millilitres of juice are in this container?

- A 2700 ml B 2750 ml C 2800 ml D 2850 ml E 2900 ml
-

41

Sandstones Bed & Breakfast

1 family room for 1 night: £120

Stay for 3 nights and get 10% off your bill

Stay for 5 nights and get 20% off your bill

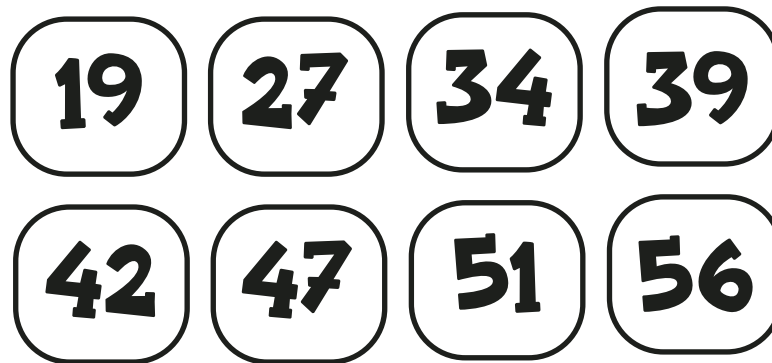

The McClean family stayed at Sandstones Bed & Breakfast for three nights. The Turbott family stayed at Sandstones Bed & Breakfast for five nights.

What is the difference in price between what the McClean family spent and what the Turbott family spent?

- A £156 B £192 C £216 D £240 E £252

42

These eight number cards are placed on a table with their faces down. One card is turned over at random.

Which of the following statements is true?

- A There is a greater chance of choosing an even number than an odd number.
 - B There is a greater chance of choosing a square number than a cube number.
 - C There is a greater chance of choosing a prime number than an even number.
 - D There is a greater chance of choosing a cube number than a multiple of 3.
 - E There is a greater chance of choosing a multiple of 3 than a prime number.
-

43

Which of the following shapes has the greatest number of vertices?

- A cylinder
 - B cube
 - C cone
 - D square-based pyramid
 - E triangular prism
-

44

A train takes exactly 160 minutes to travel from Garrettsville Station to Dillingsworth Station.

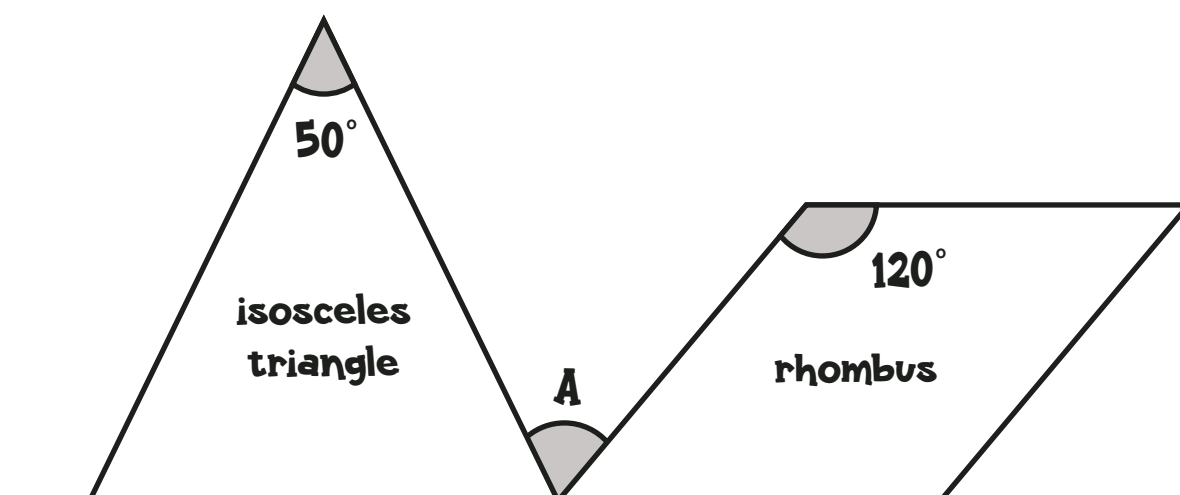

A train travelling between these stations arrives at Dillingsworth Station at 19:05.

At what time did this train depart Garrettsville Station?

- A** 4.05 pm **B** 4.25 pm **C** 6.25 pm **D** 9.45 pm **E** 10.05 pm
-

45

An isosceles triangle and a rhombus are placed next to each other. They are both sitting on the same straight line.

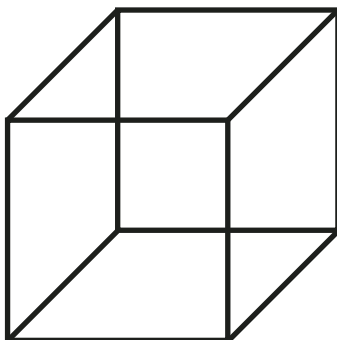

What is the size of Angle A, which is created by the gap between the isosceles triangle and the rhombus?

- A** 55° **B** 60° **C** 65° **D** 125° **E** 130°
-

46

Each edge on this cube measures 2 cm.

What is the volume of the cube?

- A 24 cm³ B 64 cm³ C 6 cm³ D 8 cm³ E 48 cm³
-

47

This table shows the heights of four plants in a classroom.

Plant A	Plant B	Plant C	Plant D
36.2 cm	34.7 cm	35.3 cm	35.5 cm

What is the range, in millimetres, of the heights of these plants?

- A 1.5 mm B 9 mm C 15 mm D 35.5 mm E 355 mm
-

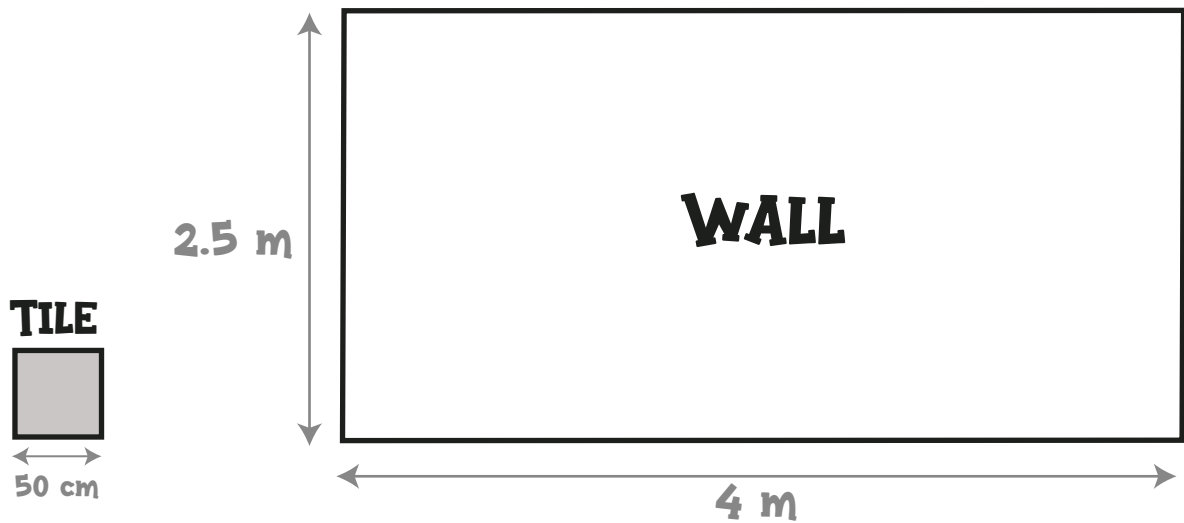

48

Which of the following numbers is one hundredth less than 5100?

- A 5000 B 5099.09 C 5099.99 D 5099.999 E 5199.99
-

49

A wall measures 4 m by 2.5 m. Mr Graham wants to cover this wall with square tiles that each have a side length of 50 cm.

How many tiles does Mr Graham need to cover the entire wall?

- A 4 tiles
- B 20 tiles
- C 25 tiles
- D 40 tiles
- E 100 tiles

50

Ailsa turns anticlockwise through 225° to face southwest.

In which direction was Ailsa facing before she turned?

- A southeast
- B east
- C northeast
- D north
- E northwest

For questions 51 - 56, you have to **write your answers** in the boxes provided on your answer sheet. The units of measurement have been given.

51

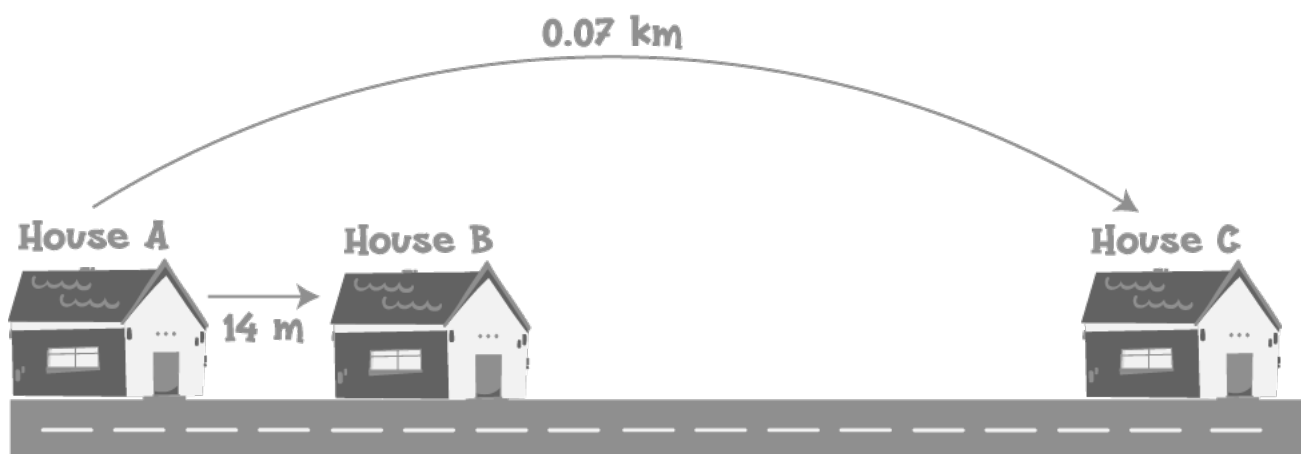

$$66 \times 2.8 = 184.8$$

What is the answer to 6.6×280 ?

.....

52

The distance from House A to House B is 14 metres.
The distance from House A to House C is 0.07 kilometres.

What is the distance, in metres, from House B to House C?

.....

53

The rule for this sequence is multiply by 3 then subtract $\frac{1}{4}$.

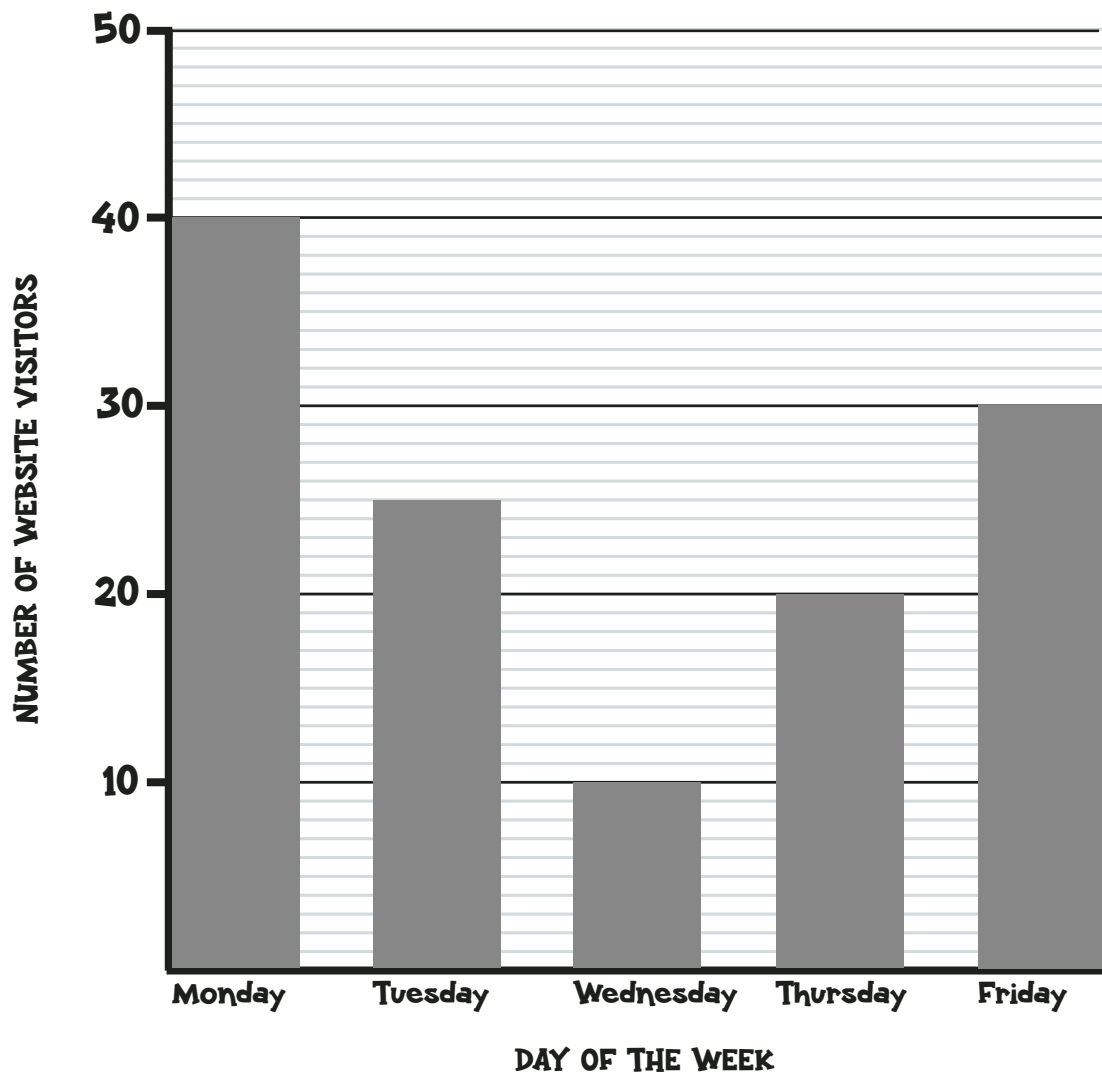

5 $14\frac{3}{4}$ _____ $131\frac{3}{4}$ 395

What is the missing third number in the sequence?

.....

54

This bar chart shows the number of visitors to a website on each day from Monday to Friday.

On which day of the week was there a 50% increase in the number of visitors, compared to the previous day?

.....

55

The perimeter of this rectangle is 20 cm.

The length of the rectangle is 6 cm more than the width.

What is the length of the rectangle?

56

IN	→ $\div 9$ → $- 14$ →	OUT
?	_____→	67

What is the missing number that was entered into this function machine?
